

JOB DESCRIPTION FOR ENERGY CONSULTANT POSITION AT BOSTON PACIFIC

Boston Pacific seeks to hire Energy Consultants with 1 to 3 years of experience who can significantly contribute to high-profile consulting projects. Our size and specialization in the energy industry gives Energy Consultants the unique opportunity to gain valuable experience in current energy matters, have significant client contact, and have the chance to make a real impact in the energy industry.

While the duties and responsibilities will vary from project to project, Energy Consultants can expect to work in small teams with senior personnel to accomplish the goals of our clients. Below are actual examples of recent projects.

- Provided testimony on the competitive effects of a merger that would create the largest U.S. utility
- Monitored the annual wholesale electricity auction process for the entire State of New Jersey
- Assessed the market and financial potential of power projects applying for DOE's loan guarantee program under the American Recovery and Reinvestment Act (ARRA)
- Evaluated the technical and commercial feasibility of geothermal generation projects in Latin America, including the development of detailed financial models
- Advised State Commissions in Illinois and Mississippi on the cost and performance of clean coal power projects seeking their approval
- Monitored a solicitation and independently evaluated proposals for renewable power projects in the Pacific Northwest
- Advised a State Commission on the effect of Federal environmental regulations on ratepayers
- Prepared a review to a regional transmission organization of a major proposal for new market design
- Advised a State Commission on the largest ever leveraged buyout of an electric utility

Boston Pacific offers competitive salary and benefits. We are located in downtown Washington, DC.

QUALIFICATIONS

- 1-3 years work experience, in the energy industry or related fields
- Consulting experience a plus
- Degree in business, engineering, math, physical sciences or economics. Masters degree a plus
- A real interest in developing an expertise in the energy sector through smart, hard work
- Ability to lead small teams

- Excellent academic record from a top university
- Excellent oral and written communication skills
- A focus on providing only the highest quality of service to clients
- Self-starter that is willing to take on and accept significant responsibility
- Strong analytical skills
